

WebStudy Information for Students

How do I get to WebStudy? (**Students will not be able to log into WebStudy until the day classes start.) Go to <http://cochise.webstudy.com/>

How do I log into WebStudy? Your username is your Cochise College Student ID (EXAMPLE: C0000000). Your password is your birth date in a six-digit format (MMDDYY). For instance, if you were born in 1970, make sure you put only "70" and not the "19." You should change your password to something more secure when you first log into WebStudy by clicking on the person icon  at top. Click on "About", then change your password (two entries required), then scroll down and click "Post It."

How do I view my classes? (Your courses will not appear until the first day of the semester.)

At the top right corner, you will notice a drop-down box labeled "Select a Course". Click the down-arrow, select your course and click "Go."

Now that I am in WebStudy, how do I navigate? The first thing you will notice when you have selected and entered your course is that it is set up similar to a notebook. The welcome page (or notebook cover) contains the name of the course and a short introduction from your instructor.

The course contains notebook tabs (located on the left) which organize the course. (Please note that the following are descriptions of the more commonly-used tabs. Your instructor may not use all of these tabs in the course.)

About: Contains a Course Description, with a short explanation about each Tab.

Timeline: An organized "Course Outline". This section is the "backbone" of the course, and you should start here.

Live: This area is the "chat room" featuring live audio/video chats and text chats.

News: Anything that is happening in the course will be announced in this section.

Teams: This area is used for teams working on projects. Each team will have their own chat room, assignments, and forums.

Students: Students' homepages and presentations.

Links: Internet links relevant to the course.

Grades: All course grades.

Email- This is a very important function in your online class! Under the "Letter" icon,  check "Incoming" for messages from your instructor, or "Compose" to send an email to your instructor or other students.

Personal Information - Located under the "Person" icon.  In the "About" area, you may change your password and other personal information.

Calendar - Located under the "Calendar" icon.  Check here to view assignments and links each month.

If you want to learn more about WebStudy, check out information at <http://icochise.com>.

Contact the Online Technician at cochiseonline@cochise.edu if you are having trouble or need help with WebStudy.
